

Example configuration files

Download file, copy it to microSD card (FAT/FAT32 filesystem), insert into display and go to Controller
- Updates and settings - Import.

Don't change filename, or controller will not find it. If it was renamed by system (multiple files with same name) you need to fix filename.

Standard names for controller configurations: ncconf.cfg, ncconf2.cfg, ..., ncconf9.cfg

Small geared motors

Includes PID regulators preset for small geared motors.

[Import configuration 6](#)

Surron basic configuration

Standard surron configuration.
