

Copy files to root directory of microSD card (filesystem FAT32), insert into display (contacts on top) and run update process.

**Do not downgrade firmware that was installed from factory! You may get a brick instead of controller**

To check current version open "Device information" menu.

Every device have own firmware! Display updated in display menu, controller updates through controller menu.

| Display                                                                                                                         | Controller                                                                                                                             | Release notes                                                                                                                                                                                             |
